Kelly Sports Day (P-3)	Wed 13 Sep
District Athletics	Fri 15 Sep
Italian Day	Mon 18 Sep
Electives	Mon 18 Sep
Last Day Term 3 2.30 finish	Fri 22 Sep
OCTOBER	
First Day Term 4	Mon 9 Oct

Hi Everyone,

2:30 DISMISSAL TOMORROW

Parents are reminded that students will be dismissed at 2:30pm tomorrow, Friday 30th June. After school care is available for those who need it.

TERM THREE ELECTIVES PROGRAM

Thank you to all those parents who have offered to take an elective for our grade 4/5/6 children next term. It's still not too late to add your name to our list so if you have a special skill you can share, please let Narelle Wain know. Sessions will run from 9:15am to 10:15am on a Monday morning.

HEADLICE

The holidays are coming up so now would be an excellent opportunity for those children who have head lice to get it cleared up before the start of term three. Proper treatment of head lice involves treatment and retreatment of the hair and the careful removal of all eggs. We are arranging a visit from the Nillumbik Health Department to help with treatment so you should receive a notice shortly. Successful treatment of outbreaks depend on all children having their head lice effectively treated so we need to make a concerted effort to ensure we eradicate all head lice. **The following information is from the Department of Health.**

ABOUT HEAD LICE

Head lice have been around for many thousands of years. Anyone can get head lice.

Head lice are small, wingless, blood sucking insects. Their colour varies from whitish-brown to reddish-brown. Head lice only survive on humans. If isolated from the head they die very quickly (usually within 24 hours).

People get head lice from direct hair to hair contact with another person who has head lice. Head lice do not have wings or jumping legs so they cannot fly or jump from head to head. They can only crawl.

Head Lice Egg (Nit) Head Lice Nymph Adult Female Louse

Finding head lice

Many lice do not cause an itch, so you have to look carefully to find them.

Head lice are found on the hair itself and move to the scalp to feed. They have six legs which end in a claw and they rarely fall from the head. Louse eggs (also called nits) are laid within 1.5 cm of the scalp and are firmly attached to the hair. They resemble dandruff, but can't be brushed off.

Lice can crawl and hide. The easiest and most effective way to find them is to follow these steps:

Step 1: Comb any type of hair conditioner on to dry, brushed (detangled) hair. This stuns the lice and makes it difficult for them to grip the hair or crawl around.

Step 2: Now comb sections of the hair with a fine tooth,

head lice comb.

Step 3: Wipe the conditioner from the comb onto a paper towel or tissue.

Step 4: Look on the tissue and on the comb for lice and eggs.

Step 5: Repeat the combing for every part of the head at least four or five times

If lice or eggs are found, the hair should be treated.

If the person has been treated recently and you only find empty hatched eggs, you may not have to treat, as the empty eggs could be from a previous episode.

Treating head lice

Treating head lice involves removing lice and eggs from the hair. There are two ways you can do this:

Buying and using a head lice lotion or shampoo, following the instructions on the product

Using the conditioner and comb method (described under 'finding head lice') every second day until there have been no live lice found for ten days.

If you choose to use a head lice product always read and follow the instructions provided with the product carefully.

The following points may also be helpful:

Head lice products must be applied to all parts of the hair and scalp.

No treatment kills all of the eggs so treatment must involve two applications, seven days apart. The first treatment kills all lice; the second treatment kills the lice that may have hatched from eggs not killed by the first treatment.

Cover the person's eyes while the treatment is being applied. A towel is a good way to do this.

If you are using a lotion, apply the product to dry hair.

If you are using a shampoo, wet the hair, but use the least amount of water possible.

Apply the treatment near the scalp, using an ordinary comb to cover the hair from root to tip. Repeat this several times until all the hair is covered.

There is no need to treat the whole family - unless they also have head lice.

Concentrate on the head - there is no need to clean the house or the classroom.

Only the pillowcase requires washing - either wash it in hot water (at least 60C) or dry it using a clothes dryer on the hot or warm setting.

Head lice eggs

Head lice eggs are small (the size of a pinhead) and oval. A live egg will 'pop' when squashed between fingernails.

Dead eggs have crumpled sides and hatched eggs look like tiny boiled eggs with their tops cut off.

Head lice combs

Combs with long, rounded stainless steel teeth positioned very close together have been shown to be the most effective, however, any head lice comb can be used.

Thanks again,

Laurie Murray

 - or electronic funds transfer to BSB 633-000, Account number 137497202.
- Please include your surname in the description.

125TH ANNIVERSARY

Dear Parents,

As you all know, our whole school production of Alice the Musical will take place next term. We are looking for a team of helpers to assist in some 'Crafternoons' to put together some costumes. Non-sewers are more than welcome as many of the costumes will come together using hot glue guns and other craft methods. Please return the tear off slip below and you will be contacted by Bianca (Coco's mum) to discuss times and dates.

Thank you
Antonietta Avicolti

I can help with the Costume Crafternoons.
